Active Reading Techniques

- **Pre-reading:** Before diving into the text, skim the chapter's introduction and headings to get an overview of the content. This provides a framework for understanding the information as you read.
- **Annotating:** Take notes directly in the text, highlighting key phrases, underlining important concepts, and writing short summaries in the margins. This active engagement significantly improves retention.
- **Summarizing:** After each section, summarize the main points in your own words. This forces you to actively process the information and identify the core ideas.
- **Asking Questions:** As you read, formulate questions about the text. This encourages critical thinking and helps you identify areas where you need further clarification. Consider questions like: What is the main argument? What evidence supports this argument? What are the implications of this information?
