Using the Pexto 152 Shear: A Step-by-Step Guide

Before operating the Pexto 152 shear, it's crucial to review all safety precautions outlined in the manufacturer's instructions. Always wear appropriate safety glasses and gloves.

Steps for Using the Pexto 152 Shear:

1. **Adjust the blade gap:** Adjust the gap according to the thickness of the metal you're cutting. Refer to the manufacturer's instructions for specific guidelines. Improper adjustment can lead to inaccurate cuts or blade damage.
2. **Secure the metal:** Firmly hold the

metal sheet in place, ensuring it's aligned with the cutting blades. Avoid any loose or wobbly positioning that might lead to inaccurate cuts or injury.

3. Apply even pressure: Apply steady, even pressure to the handle while smoothly operating the shear. Avoid jerking or applying sudden force. A controlled, even pressure is key to precise cuts.

4. Make the cut: Slowly guide the metal through the blades, maintaining consistent pressure. Never force the shear; if it feels difficult, re-evaluate the blade gap and metal positioning.

5. Clean the blades: After each use, clean the blades with a brush to remove any metal shavings. This simple practice extends the lifespan of your tool.
