FAQ: Addressing Common APUSH Unit 2 Questions

Q1: What is the significance of mercantilism in the context of APUSH Unit 2?

A1: Mercantilism was the dominant economic theory of the time, shaping the relationship between Britain and its American colonies. It held that a nation's wealth was best measured by its gold and silver reserves, thus requiring a favorable balance of trade. Colonies existed to serve the mother country, providing raw materials and markets for manufactured goods. This system led to restrictions on colonial trade through acts like the Navigation Acts, fostering resentment and contributing to the growing tensions that ultimately led to revolution.

Q2: How did the Enlightenment impact the American colonies?

A2: The Enlightenment's emphasis on reason, individual rights, and natural law profoundly influenced colonial thought. Thinkers like John Locke, whose ideas on natural rights and limited government, significantly impacted the colonists' understanding of their relationship with Britain. These ideas provided the philosophical foundation for the American Revolution.

Q3: What were the major causes of the French and Indian War, and what were its consequences for the American colonies?

A3: The French and Indian War stemmed from competition between Britain and France for control of North America. The war's outcome, a British victory, significantly altered the relationship between Britain and its American colonies. The immense cost of the war led to increased British taxation and tighter control over the colonies, sparking colonial resistance and ultimately contributing to the American Revolution.

Q4: What is the significance of the Great Awakening in APUSH Unit 2?

A4: The Great Awakening, a religious revival movement, profoundly impacted colonial society. It emphasized emotional religious experience and challenged established religious authority. This led to increased religious diversity and a sense of shared American identity that transcended denominational differences, also contributing to the developing revolutionary spirit.

Q5: How did different colonial regions develop distinct economies and social structures?

A5: The geography and climate of different colonial regions shaped their economies. New England, with its rocky soil, developed a diversified economy based on fishing, shipbuilding, and trade. The Southern colonies, with their fertile land, developed an agrarian economy largely dependent on enslaved labor to cultivate cash crops like tobacco and rice. These economic differences led to distinct social hierarchies and power structures.

Q6: What role did salutary neglect play in the development of colonial America?

A6: Salutary neglect refers to the British policy of relaxed enforcement of strict mercantilist policies in the American colonies during the early 18th century. This period of relative autonomy allowed colonial governments to develop their own institutions and practices, fostering a sense of self-governance and contributing to the later resistance to British authority. However, the end of

salutary neglect was a significant factor contributing to colonial grievances.

Q7: What were the key arguments presented in the Declaration of Independence?

A7: The Declaration of Independence articulated the colonists' grievances against British rule and asserted their right to self-governance. It presented arguments based on natural rights philosophy, asserting that governments derive their just powers from the consent of the governed and that people have the right to alter or abolish governments that become destructive of their rights.

Q8: How did colonial resistance to British policies evolve over time?

A8: Colonial resistance to British policies began with petitions and boycotts, escalating to more forceful measures like protests, riots, and eventually armed rebellion. This escalation was fueled by increasingly restrictive British policies and the colonists' growing sense of self-identity and political consciousness. The development of revolutionary ideas and organization played a key role in this escalation.
